

## Portal Integration Products:

### Business Intelligence

| <b>Actuate Gadget Suite</b>  |   | <b>v. 1.0</b> |
|--|---|---------------|
| Built by Blackstone Technology Group, these gadgets are intended to be a starting point for companies wishing to build out integration with Actuate. |   |               |
| Actuate Encyclopedia   | Users can browse the Actuate Encyclopedia, a list of folders that contain e.Reports. Users can select which e.Reports they wish to view from the folders and can easily drill down and review the report content. |               |
| Actuate Channels   | Users can subscribe to select channels based on associated e.Reports to find out when information is new or changed. When an e.Report is modified, subscribers are informed of any updates.                       |               |
| Actuate View Content   | Users can specify which e.Reports they wish to view and search the reports or download them in PDF, XML, or DHTML format.   |               |

| <b>Advanced Metrics Gadgets</b>  |  |
|--|--|
| Track and display user logins, cards that users are opening, number of gadgets selected person, etc. |  |
| Advanced Metrics Gadgets   | Track and display user logins, cards that users are opening, number of gadgets selected person, etc. |

| <b>Embed a crystal report using a JAVA applet</b>    |  |
|--|--|
| Embeds a crystal report in the form of a JAVA applet |  |
| Embed a crystal report using a JAVA applet           | Embeds a crystal report in the form of a JAVA applet |

| <b>Topical eMail Search</b> |                             |
|-----------------------------|-----------------------------|
| Search email lists by topic |                             |
| Topical eMail Search        | Search email lists by topic |

### Collaboration

| <b>ActiveForum</b>  |   |
|---|---|
| Create threaded discussions using Active Forum technology |   |
| ActiveForum   | Create threaded discussions using Active Forum technology |

| <b>AOL Instant Messenger</b>               |  |

|   |   |
|---|---|
| <b>New Gadgets gadget</b>   |   |
| Uses the Plumtree API to list the gadget that have been created in the last 30 days. Allows the user to preview the gadget and then add it to their page all from the one gadget interface. This is similar to gadgets like this in the past, but it makes sure the gadget is a personal gadget, so a user cannot add a community gadget to their mypage. |   |

| <b>Online Users</b>                        |  | <b>v.</b> |
| Shows what users are online. 3.51, native. |  |           |
| Online Users                               | Shows what users are online. 3.51, native. |           |

|  |   |
|--|---|
| <b>Password Policy Changes</b>   |   |
| Enforce a password policy where the user must change their password every 90 days. The user must also have a password that is at least 8 characters long and have two of the three rules: one upper case letter, one digit, and one special character. This process makes changes to the login and password change .asp files and makes one new colum entry in the PTUser table. |   |

| <b>Realtime User Tracking</b>  |   |
| This is an enhanced version of the User Tracking gadget. This will show which users are logged into which servers, tracks the authentication source, and contains both a history and detail report(of current users) that can be customized by the end user. Administrators can delete the gadget's history. Installation of the gadget requires modification to config.xml, dologoff.asp, global.asa, and utility.asp as well as the creation of a database. It is a native |   |
